

bimap::bidirectional
_map::at

bimap::bidirectional
_map::contains

bimap::bidirectional
_map::erase

bimap::bidirectional
_map::end

```
graph LR; A[bimap::bidirectional_map::at] --> D[bimap::bidirectional_map::end]; B[bimap::bidirectional_map::contains] --> D; C[bimap::bidirectional_map::erase] --> D;
```

The diagram illustrates the relationship between three methods of the `bimap::bidirectional_map` class and the `bimap::bidirectional_map::end` method. Three white boxes on the left, each containing a method name, have blue arrows pointing to a single gray box on the right containing the `bimap::bidirectional_map::end` method name. The arrows originate from the bottom-right of the first box, the right side of the second box, and the top-right of the third box.
