

bimap::impl::AllocOncePointer
::AllocOncePointer

bimap::impl::AllocOncePointer
::operator=

bimap::impl::AllocOncePointer
::swap

```
graph LR; A[bimap::impl::AllocOncePointer::AllocOncePointer] --> C[bimap::impl::AllocOncePointer::swap]; B[bimap::impl::AllocOncePointer::operator=] --> C;
```

The diagram illustrates a mapping or inheritance relationship. On the left, there are two white rectangular boxes with black borders. The top box contains the text 'bimap::impl::AllocOncePointer::AllocOncePointer' and the bottom box contains 'bimap::impl::AllocOncePointer::operator='. On the right, there is a single gray rectangular box with a black border containing the text 'bimap::impl::AllocOncePointer::swap'. Two blue arrows originate from the right side of the two white boxes and point towards the left side of the gray box, indicating that both the 'AllocOncePointer' and 'operator=' methods of the 'bimap::impl::AllocOncePointer' class are associated with or mapped to the 'swap' method of the same class.
